

Specifications:

1. Electrical characteristics:

Sensor type: Hall effect
 Resolution: unlimited
 Power supply voltage: 5±0.5VDC
 Output: 0.5~4.5VDC
 Current consumption: 25mA

2. Mechanical characteristics:

Mechanical stroke angle: ±18°
 on axis
 Service life: >10 million cycles
 Vibration: 7.67Gs RMS
 Impact: 50Gs

3. Environmental parameters:

Working temperature: -40°C~80°C
 Storage temperature: -55°C~85°C
 EMI/RFI level: 100V/m
 Protection: Ball handle above panel IP67

Under panel IP67 with vent plug

针脚分配

pins 1	ground
pins 2	power
pins 3	X signal output
pins 4	Y signal output
pins 5	rocker switch
pins 6	no connection

skills requirement:

1. The connecting parts are locked according to the specified torque.
